

OSG Deployment Meeting

October 29th

2 pm Central

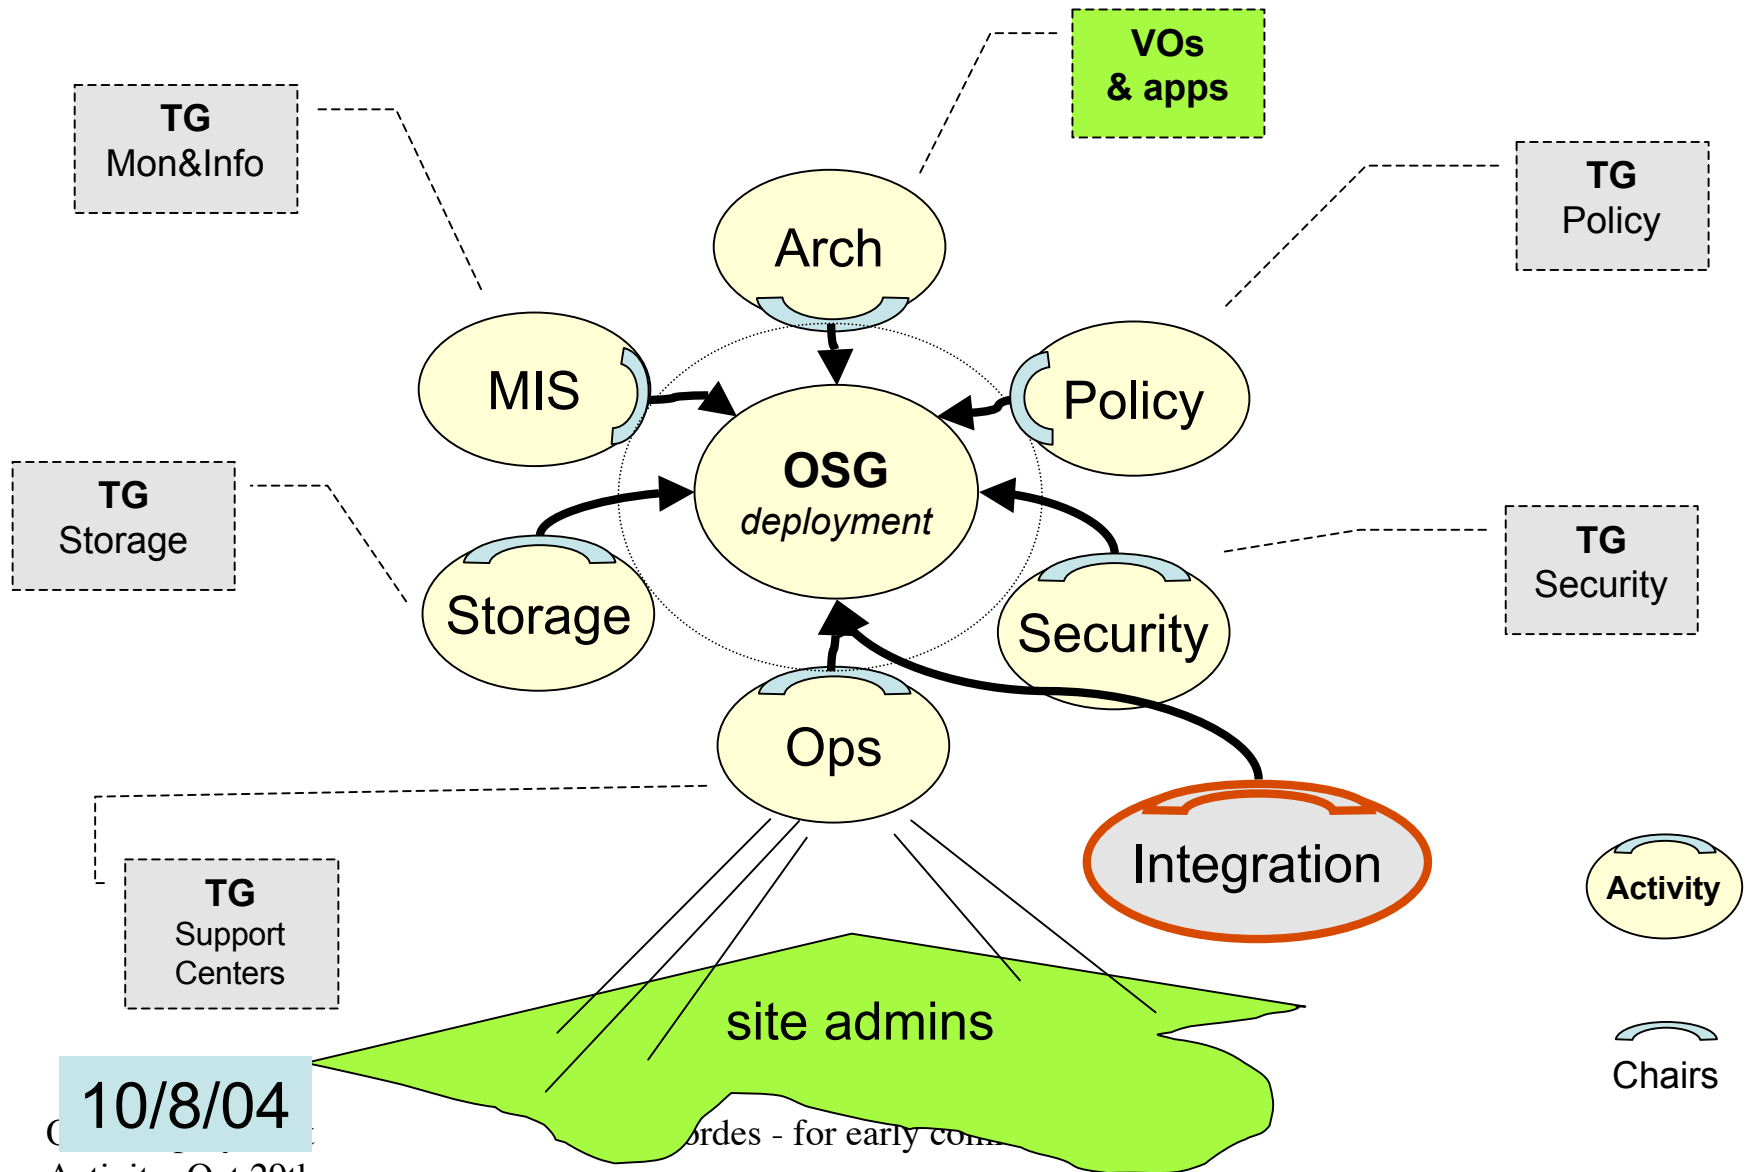

OSG Deployment Activity

- Technical Groups have chairs who organize meetings of self organized volunteers.
- Activities are where the work is done. Their chairs act as Activity Coordinators.
 - Activity Chairs commit to an effort contribution for the duration of the activity and give their best effort towards enabling the deliverables of the activity to be successfully met.
 - this effort is expected to be leveraged off other goals and deliverables of the individuals.

Participation in an Activities

- Activities will expect to be able to define and rely on contributions of deliverables and effort.
 - This is necessary if we are to meet the Spring deliverables.
 - A definition of overall effort contributions would help ensure expectations are understood but commitment to deliverables and a timescale is more important.

OSG deployment landscape

Input from last weeks meeting:

- The VOs and Applications need representation and participation in the Deployment Activity.
- The Blueprint Activity gives input to the Deployment Activity. It does not define nor execute the plan.
- Each of the Activity Coordinators needs to supply input to the Deployment Activity Plan - for the meeting on 29th. A draft of the current input to the plan will be distributed before the meeting.

Activities

- Activities do work. There are expectations of deliverables and schedules.
- They need commitments from the Stakeholders and Expectations of some consistency of effort and delivery.
- Now is the time to ask our Stakeholders to staff our Deployment and our Satellite Activities.
 - Maybe there will be many more activities than are listed here?
- We need enough information to do a risk assessment at the Dec meeting.

Need means of Stakeholder Representation in Deployment Activity

- VOs need to contribute to design, implementation and decisions
- Facilities and Sites need to contribute to design and implementation decisions.
- Activities need path to obtain resources, clarify expectations and resolve conflicts.

modified organization?
